- Growth and development
- Innovative and established industry
- Fast paced and challenging environment

**Ready to make the move? You're one step closer to a new exciting career - APPLY NOW!**

**What you will do:**

- Provide QA and QA Leadership for development of web-based applications in an agile (scrum) environment.
- Functional/regression testing of browser-based web application using manual/automation testing methodologies.
- Review, analyze and provide feedback on user stories' acceptance criteria.
- Proactively communicate/collaborate with BA/Project Owner/DEV/DBE to make sure user stories acceptance criteria & requirements are implemented correctly.
- Create and execute automated test cases against different SDLC environments and analyze execution results.
- Staying on top of all bugs/issues. Help triage bugs and drive issues to resolutions. Keeping everyone aware of QA status.
- Work closely with international development and QA teams to ensure quality of products.
- Ensure defined software quality assurance procedures are being followed.
- Participate in the identification and implementation of continuous improvement, integration, and deployment processes & standards.

**What we're looking for:**

- Bachelor's degree in computer science, IT, Management Information Systems, Engineering, or related discipline.
- Great leadership skills.
- **The ability to accommodate co-workers in different time zones**
- **4+ years' experience in software manual/automation testing**
- **4+ years' experience in working in an Agile/Scrum environment**
- **4+ years' experience in testing methodologies, process, and best practices along with strong understanding of current application development technology**
- Familiarity with security testing
- 3+ years' experience in automation tools (Selenium) & testing frameworks (C#, Java, MSTest, NUnit, xUnit, JUnit)
- 3+ years' experience in testing Web based applications.
- 3+ years' experience in testing API's
- 3+ years' experience writing and executing SQL queries for data validation & reporting.
- 3+ years' experience in mentoring other QA team members
- Proven ability to work in a fast-paced, cross-functional engineering team.
- Strong requirement analysis and test case design/execution capability
- Strong understanding of functional, regression, integration testing
- Self-starter with ability to work either independently or as a team member
- Outstanding verbal and written communication skills in English
- Good reading and writing skills in French will be considered a strong asset
- Able to self-manage and prioritize work effectively under pressure

- Knowledge using JIRA or other bug/agile project management tools
- Knowledge using Testlink or other test case repository tools
